

# Maintain market visibility

## The Importance of Uploading your Rate Data:

### Benchmark

You can **only** benchmark yourself against the market if you have uploaded your own data. We standardize all the data we receive, giving you the confidence that you are comparing your understanding of your business performance to the broader market. The more data you give the more granular our insights can get.

### Budget

With your data in the platform, we can better understand your budget needs and allow you to understand opportunities available to you when looking at your procurement / selling strategy.

We can fully understand your spend, as your data is the only way to get a bearing on your performance.

### Optimize

There is too much complexity if you don't have your data in the platform. It is impossible to manually match it. Unlock the Xeneta use cases with the data in the platform (budget, analyze & monitor all become more powerful).

### Contract

Your company may be contractually obligated to supply data. Speak with your Customer Success Manager if you're unsure about your data requirements.

**Data-driven insights start with you. Retain market visibility with two simple steps.**

#### 01 Collect your rates

Simply collect your new rates as shown in the appendix.

#### 02 Upload your Rates into Xeneta

Upload your Excel file with one click and provide any necessary comments.

# XENETA

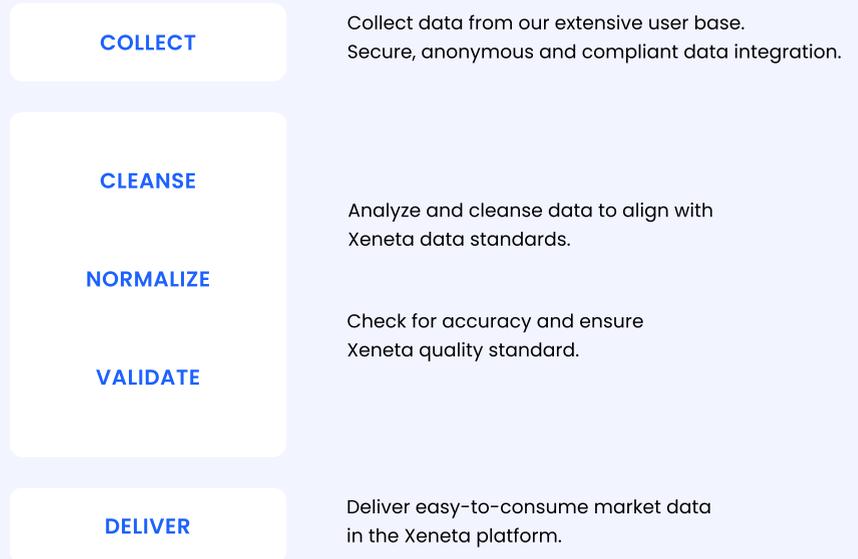

## Data Security Matters

All ocean and air freight-rate data that you see in the platform is an aggregated, anonymized view of the over 300 million rates we have collected. Your unique data and the display of this data will never be shown to any other customers. We respect your data privacy.

## Our Data Process

Once we receive your data, we are committed to delivering your prices in the dashboard within 5-7 working days.
